# **Creating an Inclusive Society:** Community-based Rehabilitation

**Annual Report**  
2020-2021

**Fr. Baby Ellickal, MI**  
*President, Sneha Charitable Trust*

## **Creating an Inclusive Society: Community-based Rehabilitation**

A disabled child represents a vulnerable section of the society because of the socio-psychological restrictions due to disability. The need is to have a comprehensive program for the welfare of the disabled children and their family members to enable them to lead a normal life. The community-based rehabilitation is a dynamic program for supporting differently-abled children to lead better quality of life with dignity, wherein their rights are respected and guarded within their own communities, and it creates platform for addressing the discriminatory practices in the community.

It focuses on enhancing the quality of life for the most vulnerable children and their families, to meet their basic needs and ensuring inclusion and participation in their own development and also participating in the community development. Disability sector has recognized dignity, respect, inclusion, participation, equalization of opportunities and empowerment as key issues of rehabilitation. During the last two decades, there has been a growing realization that institutional care for the disabled is not entirely suitable for their individual needs, dignity and independence. There has been relentless advocacy for community care despite the enormous stigma of having a disabled person at home. In India, where family support is the norm and the only form of support available for thousands of years, community care is being thought as a suitable program for meeting the challenges in the disability sector.

I am happy to know that St. Camillus Ashram has developed a multi-sectoral approach that empowers persons with disabilities to access and benefit from education, employment, health and social service. As you are bringing out your Annual Report, I would like to express my sincere appreciation to Rev. Fr. Benny Changelikavil, the Director of St. Camillus Ashram, and Rev. Fr. Shiju Joseph, the Administrator, for their hard work, commitment and selfless love for these vulnerable children. A word of thanks and appreciation to all the staff, benefactors, well-wishers and CWC members for their timely support and remarkable service. Let us continue with this mission of Community-based rehabilitation program in order to create an inclusive society for the most vulnerable children in the society.  
God Bless you!

**Fr. Benny Chengalikavil, MI**  
*Director, St. Camillus Ashram*

## A Challenge and a Blessing

**S**t. Camillus Ashram, being a unit of Sneha Charitable Trust and one of the ministry centers of St. Camillus Province, India, does a marvelous mission of taking care of children with multiple disabilities. This is a new initiative of the province. We know that any disability handicaps a person. Here we are trying to take care of children who are handicapped in many ways. This is something challenging and at the same a blessing. We want all those who enter this home experience the presence of God. That is why we have named the center *Daivalayam* which means “house of God”. This is a humble attempt to share and eradicate the pain in the society. This is a compassionate response to the cry of the poor and suffering. There are a lot of children thrown to the street like lifeless objects only because they are disabled. Therefore it is an attempt from our part to respond to the need of the time. Though this ministry is really challenging, there is an amazing joy that brings to each one of us who cares for these little angels.

This new mission has not started in an overnight, but is the fruit of the sweat and blood of a few who tirelessly worked for its realization. Since it was a new venture for Camillians, the pioneers had to struggle a lot for making it a reality. They have faced so many problems like setting up the building, finding the funds for running the center, protest from the villagers, registration of the center etc. Following the footsteps and the teaching of our saintly Founder Camillus, we take care of the children like a mother cares for her only son who is ill. In one way or other, all the children in this center are sick, who need 24x7 care and affection.

As we bring out this Annual Report, I would like to express my sincere thanks to God almighty for sustaining and guiding us. I also thank Rev. Fr. Baby Ellickal, our provincial who is constantly supporting and encouraging us, Bro. Antony Raj and Fr. Siby Kaitharan, the pioneers of this center for their hard work, all our staff for their true dedication and commitment, benefactors, and well-wishers for their timely help and thoughtfulness.

## Introduction

**St. Camillus Ashram** is a unit of Sneha Charitable Trust (SCT). Since its inception in 2003, SCT has been making its mark in the healthcare sector in India through an array of programmes meant to serve the poor and marginalized sections in the society. SCT is managed by the Ministers of the Infirm (Camillians), an International faith-based Organization which is exclusively involved in the healthcare field for the past 450 years.

SCT has a radical and distinctively global healthcare action: care and support to People Living with HIV/AIDS (PLHIV), destitute, mentally and physically challenged children, training in quality healthcare management, vocational rehabilitation, training and job placement. The Trust has also been collaborating with various national and international programmes of care implemented through governmental and non-governmental agencies.

### **History**

The actual plan and vision of St. Camillus Ashram at Yellampet, Secunderabad, was to have different service endeavors, such as a centre for children with multiple disabilities, a destitute home, and *San Camillo* occupational rehabilitation centre.

### **VISION**

Comprehensive healthcare to the sick with a preference for the marginalized, neglected, lonely, and disabled.

### **MISSION**

Providing an environment of care and love for the physically and mentally disabled children for enhancing their quality of life.

### **OBJECTIVES**

- To provide quality and compassionate care for children with special needs
- To provide shelter and rehabilitation to children with multiple disabilities
- To ensure special children dignity of life.
- To enhance the quality of the life of the disabled children

Consequently, *San Camillo* occupational rehabilitation centre was inaugurated in 2016 at Yellampet in a land we had purchased in 2012. Fr. Siby Kaitharan was appointed in-charge of the rehabilitation centre. But unfortunately, it was closed later on. When the proposed home for the disabled children was almost ready in January 2017, Bro. Madhu, together with two caretakers and four children, started to live there. By December 2017, Fr. Benny, Bro. Madhu, 8 staff members, and 10 children began to live here permanently. The home for the disabled is named *Daivalayam*. The plan for the destitute home has not yet been realized.

***Daivalayam*** is a home for children with multiple disabilities. It is one of the most challenging, creative and demanding initiatives of Camillians. ***Daivalayam*** means “temple of God”. This is a place where children with mental and physical disabilities are cared and respected as the ***image of God***. We are inspired by the compassionate and merciful love of JESUS for the sick, and we follow the example set forth by St. Camillus de Lellis who considered sick as his ***lords and masters***.

At present, there are 27 children, and 12 staff members in this center. Among these, most of them are orphans with many disabilities. All these children have been referred to us by Child Welfare Committee of the various districts of Telangana state. Some of the children are given special education by the St. Ann's Sisters. Most of these children are in need of constant personal care and attention.

## OUR FOUNDER

**St. Camillus de Lellis** is the Founder and Patron of the Order of the Ministers of the Infirm (Camillians). Born on May 25, 1550 at Bucchianico in Italy, Camillus was a genius divinely enlightened in the virtue of charity. The way he served the sick marked a turning point in the healthcare world. The brotherhood he founded provides leadership in healthcare throughout the world today.

Camillus chose a red cross as the distinguishing badge for the members of his Order. After leading the movement throughout Italy, Camillus died on July 14, 1614. In 1742, Pope Benedict XIV proclaimed Camillus blessed; in 1746 he canonized him, calling him the **“Founder of a new school of charity”**.

## Services Provided at Daivalayam

### ■ In-house facility for 30 children

There are three wards, in which 10 children each can be accommodated. All these wards are bath-attached and with other necessary facilities. At present 27 children - 26 male and one female - are given in-house care at *Daivalayam*.

### ■ Personal care round the clock

We give 24x7 care and attention to almost all the children, because they are both mentally and physically disabled. Personal care includes feeding, giving them bath, changing their clothes and diapers etc.

### ■ Nutritional care

We provide special nutrient food to our children, as per the nutritional need of each child. Since most of them are not able to eat normal food, we feed them with liquid food. Our nurses and caretakers pay special attention to the nutritional needs of each child.

### ■ Medical care

Our children are not normally healthy. Therefore, most often they need some medical care too. We have regular visits of doctors who look into their medical needs. Moreover, children are taken to the National Institute for the Mentally Handicapped (NIMH) in Hyderabad once in six months for various tests. A few of them take regular medicines for fits. In case of any health emergency,

we transport the child to the nearest hospital, accompanied by a nurse or a caretaker.

#### ■ **Physiotherapy and exercises**

Since most of the children are physically handicapped, they are given regular physical exercises. We have a part-time physiotherapist, and a good physiotherapy unit for this purpose.

#### ■ **Special education to the children**

We give special education to those children who are able to study little bit. We send eight of our children to *Manovikas Kendra*, a school for special children at Medchal.

#### ■ **Spiritual care**

Though our children do not participate actively in spiritual services and prayers, we do conduct daily prayers, and occasionally even special prayers at the centre.

#### ■ **Entertainment**

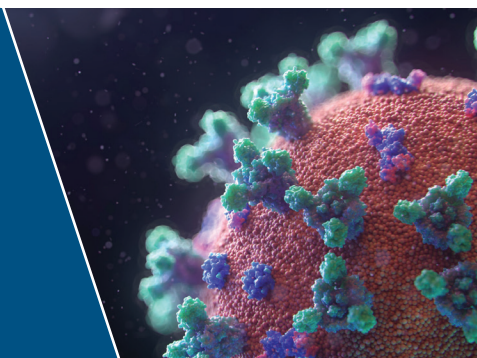

Occasionally, children are provided with various entertainment programmes, which make them happy and active. Moreover, the atmosphere of love and care in the centre makes them joyful.

## COVID-19 Relief Activities

# A Ray of Hope for the Hopeless

The COVID-19 pandemic has caused so much suffering to the people of India, and very particularly, the people of Telangana. They did not know which door to knock for help. In this difficult situation, there dawned a ray of hope for them through Bhudhist Tzu Chi Foundation and Sneha Charitable Trust (SCT). This was a real providence of God. I would say that God continues to be faithful to His promises that he would listen to the cries of his people. Being a unit of SCT, St. Camillus Ashram took leadership in organizing various relief activities in the state of Telangana.

Our team for COVID-19 relief activities was comprised of Fr. Benny Chengalikavil (Animator), Fr. Shiju Kureekattil (Project Coordinator), the members of St. Camillus Ashram, Mr. Jose (Lay Camillian Family) and his team of volunteers, and the social service center Karuna Sadan of Charity Sisters. All the volunteers deserve a great appreciation and thanks for their commitment and dedication. Many of the parish priests of the Hyderabad diocese have organized well their poor families for the food distribution and other helps.

We have done mainly four categories of activities, namely, the distribution food kits, masks, sanitizers, and linen, medical help, educational help, and agricultural help. We have covered 4 districts and 31 villages. We were all very happy and enthusiastic in doing this great service. Though at the end of the day we were all so tired, our minds were filled with happiness.

### ***Food Kits, Masks and Sanitizers Distribution***

The food has become the most valuable thing for the poor people of Telangana state during this COVID-19 pandemic. There were so many poor families who really felt very difficult to find out their daily food in Hyderabad. We have seen the real joy of the people while we were distributing the food kits. We covered many poor slums, villages and parishes of

Telangana state. We distributed food kits among the Transgenders of Hyderabad. We also rendered our services to HIV/AIDS patients in different parts of Telangana state, providing them with food materials and medicines. We distributed a lot of masks and sanitizers together with the food, because most of the poor people didn't have masks.

### ***Medical Help***

There were so many sick people who were in need of help. We could help only a selected few, because we didn't have enough budgets, and it was not that easy to arrange for all of them. We have also distributed diapers to the bedridden children in a few children's homes.

### ***Educational Help***

The COVID-19 pandemic has handicapped the system of education in India. The schools and colleges were closed due to the lockdowns. The parents found it very difficult to pay their children's fees. We feel happy that we could help so many students with their school and college fees, school bags, books, computers, mobile phones, and bicycles.

### **Agricultural Help**

The agriculture sector is also very badly affected like other sectors due to the pandemic. People did not have any money to buy the agricultural products and equipments. We could provide with many fruit tree plants, grass cutters, and spraying machines.

### **Conclusion**

“We find more happiness in giving than in receiving” (Acts. 20:35). We have experienced this in the last one year. Yes, our hearts are filled with gratitude and joy, because we could be part of this great service to the suffering. We are ever grateful to Buddhist Tzu Chi Foundation for their kindness, and to our provincial Fr. Baby Ellickal for his hard work in realizing this relief work. We also thank all our colleagues in these relief activities for their commendable services. Yes, we have become a ray of hope for the hopeless ones.

### **Total services output**

SERVICES	NUMBER OF BENEFICIARIES
Food kits	9241 families
Educational Assistance	450 families
Medical Assistance	1110 families
Agricultural Assistance	1103 families
Linen	80 families
Household items	100
Masks & Sanitizers	9500

## New Venture: St. Camillus Mobile Clinic

### Background

Healthcare sector in India, in general, and in Telangana state, in particular, does not guarantee quality, efficient, and equitable health services to all, especially to the poor sick. A major portion of healthcare facilities are in the private sector, and are located in urban areas, while the public healthcare facilities are under-resourced with poor and insufficient infrastructure. Therefore, the rural poor and urban slum-dwellers are miserably deprived of their right to access to healthcare facilities. The public healthcare systems in the villages and slums are not adequately equipped to address the healthcare needs of the poor sick people.

Responding to the healthcare needs of the poor sick, and opening a new chapter in the healing mission of Camillians in India, St. Camillus Ashram is set to actualize a Mobile Clinic project in collaboration with Buddhist Tzu Chi Foundation. The dream project of Sneha Charitable Trust (SCT), actualized through St. Camillus Ashram at Yellampet in Secunderabad, aims to strengthen the healthcare systems in the poor and remote villages of Medhcal district through partnership with various like-minded people and organizations. St. Camillus Mobile Clinic intends to

involve in promotive and preventive health services and to care for the poor sick, irrespective of caste and religion. For this purpose, a fully equipped ambulance has been donated by Buddhist Tzu Chi Charitable Foundation in Taiwan.

### The principal objectives of this initiative are:

- To provide primary essential healthcare services to the poor sick of the villages and slums
- To provide community health education
- To facilitate poor people's access to healthcare services and facilities
- To strengthen linkages and collaboration between various healthcare providers and organizations

### Beneficiaries

The direct beneficiaries of St. Camillus Mobile Clinic project are the poor sick in the remote villages of Medhcal district and in the select slums of Secunderabad. The indirect beneficiaries would be their family members and the community.

### The healthcare services envisioned by St. Camillus Mobile Clinic

Based on the preliminary surveys, visits to some villages and slums, and meetings with some of the

### Partnership with other agents

Sl. No.	PARTNERS	INVOLVEMENT
1	Buddhist Tzu Chi Foundation	Donation of a patient transport ambulance & essential medical equipments
2	DMHO/PHC/Panchayats	<ul style="list-style-type: none"> <li>• Professional/legal guidance and directives</li> <li>• Participation in government schemes</li> <li>• Identification of deserving beneficiaries</li> </ul>
3	Local NGOs and Associations	<ul style="list-style-type: none"> <li>• Voluntary Services</li> <li>• Professional/Personnel Assistance</li> </ul>
4	SCT & St. Camillus Province	<ul style="list-style-type: none"> <li>• Voluntary Services</li> <li>• Human Resources</li> <li>• Material and financial resources</li> <li>• Leadership &amp; Monitoring</li> </ul>
5	Hospitals/institutions	Secondary/tertiary care facilities

key partners, St. Camillus Mobile Clinic envisages a maximum coverage of remote villages, through frequent visits and medical camps. Our services would be:

- Addressing primary healthcare needs of the poor sick
- Investigation and management of life-style diseases (diabetes, hypertension, etc.)
- Free generic medicines, as per the requirement and advice of the medical personnel
- Care and assistance to bedridden patients
- Providing health education and tips for healthy living
- Providing nutritional supplements
- Free patient transport services to secondary/tertiary healthcare facilities

#### **Partnership with other agents involved**

St. Camillus Mobile Clinic project is organized in

partnership with government authorities, public and private healthcare facilities, ASHA workers, like-minded people and charitable organizations. [see Table]

#### **Conclusion**

As a new venture of Sneha Charitable Trust, St. Camillus Mobile Clinic project is not without challenges and limitations. Though SCT has been in the forefront of the most challenging healthcare mission in India since 2003, this new initiative poses yet new challenges. Correct assessment of the health needs of the people, continuous availability of medical and nursing personnel, financial sustainability, and establishing linkages with government bodies and systems are some of the prominent challenges of this project. Our greatest strength is our commitment, willingness, and above all, our compassionate love for the suffering people.

### **Truly Inspirational**

**Dr. Beryl D'Souza**

*DCH, MRCPCH*

**I** have had the privilege of working with the inspirational staff and the amazing children at *Daivalayam* from 2017.

During my first few visits at *Daivalayam* I had the pleasure of meeting Sandhya Priya then around 2 years with hydrocephalus. Our small Good Shepherd clinic had referred her to a Neurosurgeon for further management, and we were informed that since she had presented too late to the Neurosurgical unit, correcting the hydrocephalus was unnecessary and that she would succumb soon to her condition. That was 4 years ago. This shows the amazing and loving care that Sandhya Priya has received from the staff at *Daivalayam*.

When the Pandemic struck last year I was impressed with the strict precautions taken by the staff and the rigorous following of protocols to prevent exposure of the children from Covid-19. At around the same time Good Shepherd has started telehealth and virtual consultations. This enabled us to work with the sister staff nurse at *Daivalayam* and ensure timely medical care whenever a child fell sick. It was a pleasure working with nurse Jyothi last year as well as nurse Lisbin this year. They both have been a remarkable addition to the team that care for children. Whenever needed, the child was brought for in-person consultation and care, and if not needed, follow-up care was continued virtually. I have also been able to note that the children receive good nutritional support and physical care support. Despite many challenges and special needs children have, the children at *Daivalayam* are doing well, as healthy as possible and are surrounded by a safe, secure and loving environment. I have learnt so much and have been blessed so much by the Staff (led by Fr. Benny and the team) and the children at *Daivalayam*.

I thank the management that has started this institution, and I hope that more such homes are set up to help abandoned children with Special Needs.

*[Dr. Beryl D'Souza is the volunteer visiting paediatrician at Daivalayam]*

## True preciousness in a “broken” body

Manju Devarapalli CM

I have felt excessive sadness and emotional distress from my first visit of *Daivalayam* at Medchal almost one and a half years back. And it's on my mind wondering what actually happens to God sometimes.....and what would have happened to these kids if not for *Camillus spirit of offering life* and of caring for them.

There are lessons to be learned from everyone, no matter the type of person. I've been lucky. Extremely lucky!!! I hadn't fully realized this until my personal visits to *Daivalayam* and the time spent with Fr. Shiju and Fr. Benny on various occasions.....the way they go through each day with determination and strength which many people are bowled over by while many secretly wondering if they could do the same thing, round the clock. Certainly, *Daivalayam* is a place of great unprejudiced environment in which anyone can be what they are without judgment. This little society that forms of only 40 people is far less complex than the real world to feel so safe and clear. I go through

*Daivalayam is a place of great unprejudiced environment in which anyone can be what they are without judgment. This little society that forms of only forty people is far less complex than the real world to feel so safe and clear.*

this experience after each of my visits. It's a mental holiday as well. I don't have to think about myself. Life-changing lessons *Daivalayam* offers to me can be listed as:

- Patience can get you through almost anything.
- Disability can happen to anyone.
- Life is short. Embrace everything.
- Weakness isn't always a negative
- Compassionate, empathetic, and non-judgmental
- Exemplary communication skills
- Emotionally stable with strong self-awareness
- Problem-solving and critical thinking skills
- Attentive to details

Somehow I vividly remember being asked in front of the class what I wanted to do when I “grew up”, when I was around nine years old, and my answer was “to reach heaven”, and *Daivalayam* certainly is one such glimpse. And every visit of mine to *Daivalayam* is star moment.

People with disabilities are especially influential, as hardships in life aren't easily forgotten and handing them out more often you'll help others become more secure. It sounds so simple, but do you do it often enough? I know I don't.

[Sr. Manju Devarapalli is the part-time volunteer counselor at *Daivalayam*, and is an ardent supporter of our mission]

**Dr. Ilka M. Fernes**  
Senior Chief Medical Officer (SAG)/  
Gynaecologist

## My encounter with St. Camillus facility

**O**n the 8th of May, my sister and I went to meet the fathers at Medchal, as one of my mother's helper said she would meet us there. We were amazed at the facility, totally clean and everything hygienically maintained. The children there were from 3 years to 14 years of age, all mentally and many physically challenged.

I was humbled by the love and personal care these children received from the two fathers and other staff there. They were clean, encouraged to use their skills, and taught with great patience to become independent. They looked healthy, well-fed and happy. The happiness quotient is not possible, if they are not constantly nurtured and lovingly cared for. It was an experience I will never forget, very enriching and edifying.

My respects and regards to the wonderful Camillus fathers, for their enduring patience and care for these challenged children, and their constant efforts to make a difference in their lives.

God bless them!  
God bless those beautiful children under their care!

*[Dr. Ilka makes occasional visits to Daivalayam]*

**Sr. Jyothi, MSMM**

## Unforgettable memories at St. Camillus Ashram

**I** took charge as a nurse in the St. Camillus Daivalayam on February 11, 2020. It was my first experience to be with the children and I could serve them for thirteen months. Those were unforgettable moments and memories in my life. I really enjoyed being with, caring and working for the children. In spite of having had ups and downs, I cherish the moments I was with them. There I could feel a family atmosphere.

Working with the children is not easy task. We must have patience, love and concern to serve them. All these qualities I have seen in Fr. Benny and Fr. Shiju. They render great service to the children, especially giving bath to the children early in the morning, playing with children, their hard work, cultivation in the fields, and providing all the needs to the children. I was really inspired by them. I have never seen such a great service before. The staff too gave me great support in rendering my humble service to these children with special needs.

I sincerely thank the almighty God for giving me this gracious opportunity. I express my heartfelt gratitude to the authority of St. Camillus Ashram and the Provincial Superior who gave me this opportunity to be with St. Camillus family. My special thanks to Fr. Benny and Fr. Shiju who always guided me in all the ways, spiritually and mentally. It would be a great privilege for me to get one more chance to work with the Daivalayam family.

## Events & Moments..

**Republic Day Celebration:** The president of Yellempet panchayat Mrs. Vennila Ramakrishna and all the councilors of the panchayat with *Daivalayam* team during the Republic Day Celebration 2021

**CWC Assessment:** Members of the Child Welfare Committee during their visit to *Daivalayam*

**Reaching out:** Fr. Shiju and Sr. Manju are being honoured during one of their social outreach visits to a slum in Secunderabad

**Received with thanks:** Muthoot Finance, Secunderabad donates a washing machine to *Daivalayam*
